Global E-Mobility Solutions Accelerating EV Industry in Thailand 24 June 2021

Our Universe

We are the foundation
of the electric
revolution.

What we do

Ethical and fully
traceable battery
minerals from Europe.

Copper

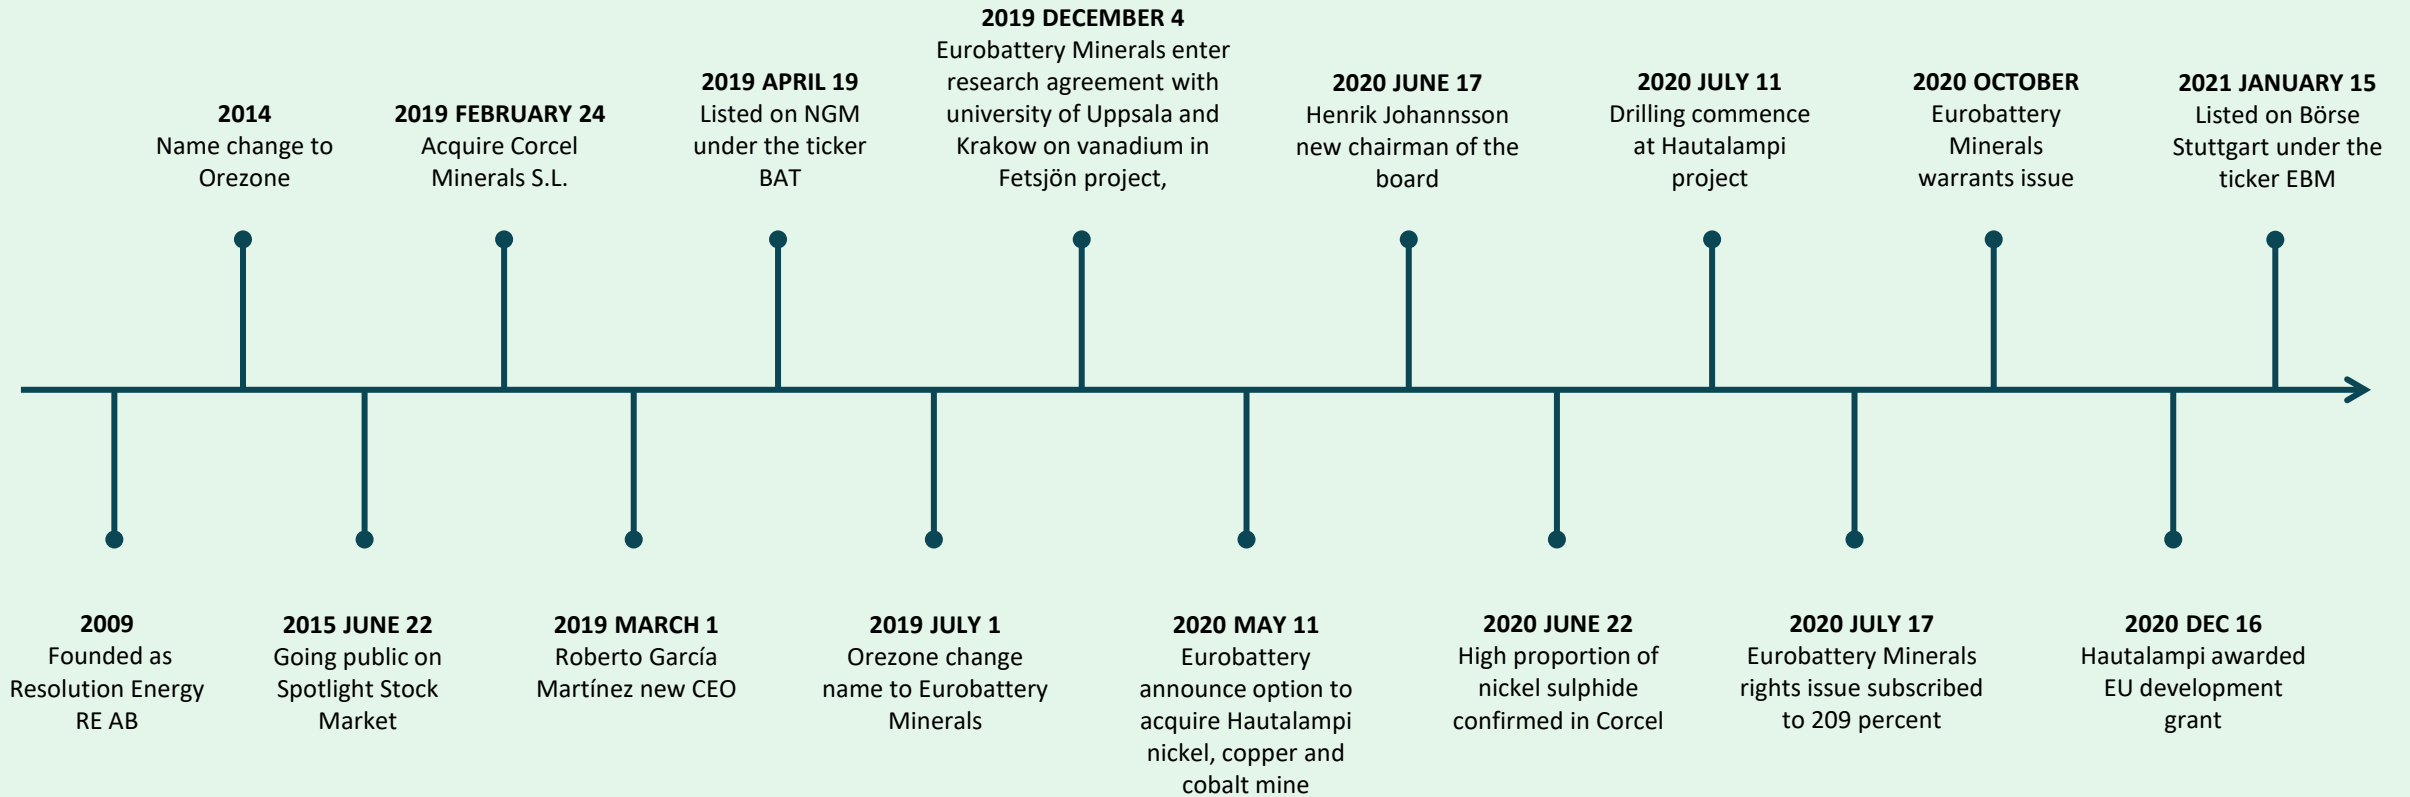

Business model

Eurobattery Minerals has several ongoing and parallel battery minerals projects in the different stages of the process.

Timeline major events

A hand is shown plugging a black and white electric vehicle charging cable into the charging port of a white car. The background is blurred, showing other vehicles and a parking lot. The entire image is overlaid with a semi-transparent teal color. The text "Market Insights" is written in white, sans-serif font across the center of the image.

Market Insights

The Electric Revolution

By 2030, total EV sales will reach

31.1 MILLION

from 2.5 million in 2020.

Battery demand will increase

14-FOLD

compared to 2018 by 2030.

The EU climate goal says by

YEAR 2050

the region will be climate neutral.

The demand for battery minerals

- Forecast for European demand for copper, cobalt and nickel
- The production of electric cars and plug-in hybrids in Europe is increasing

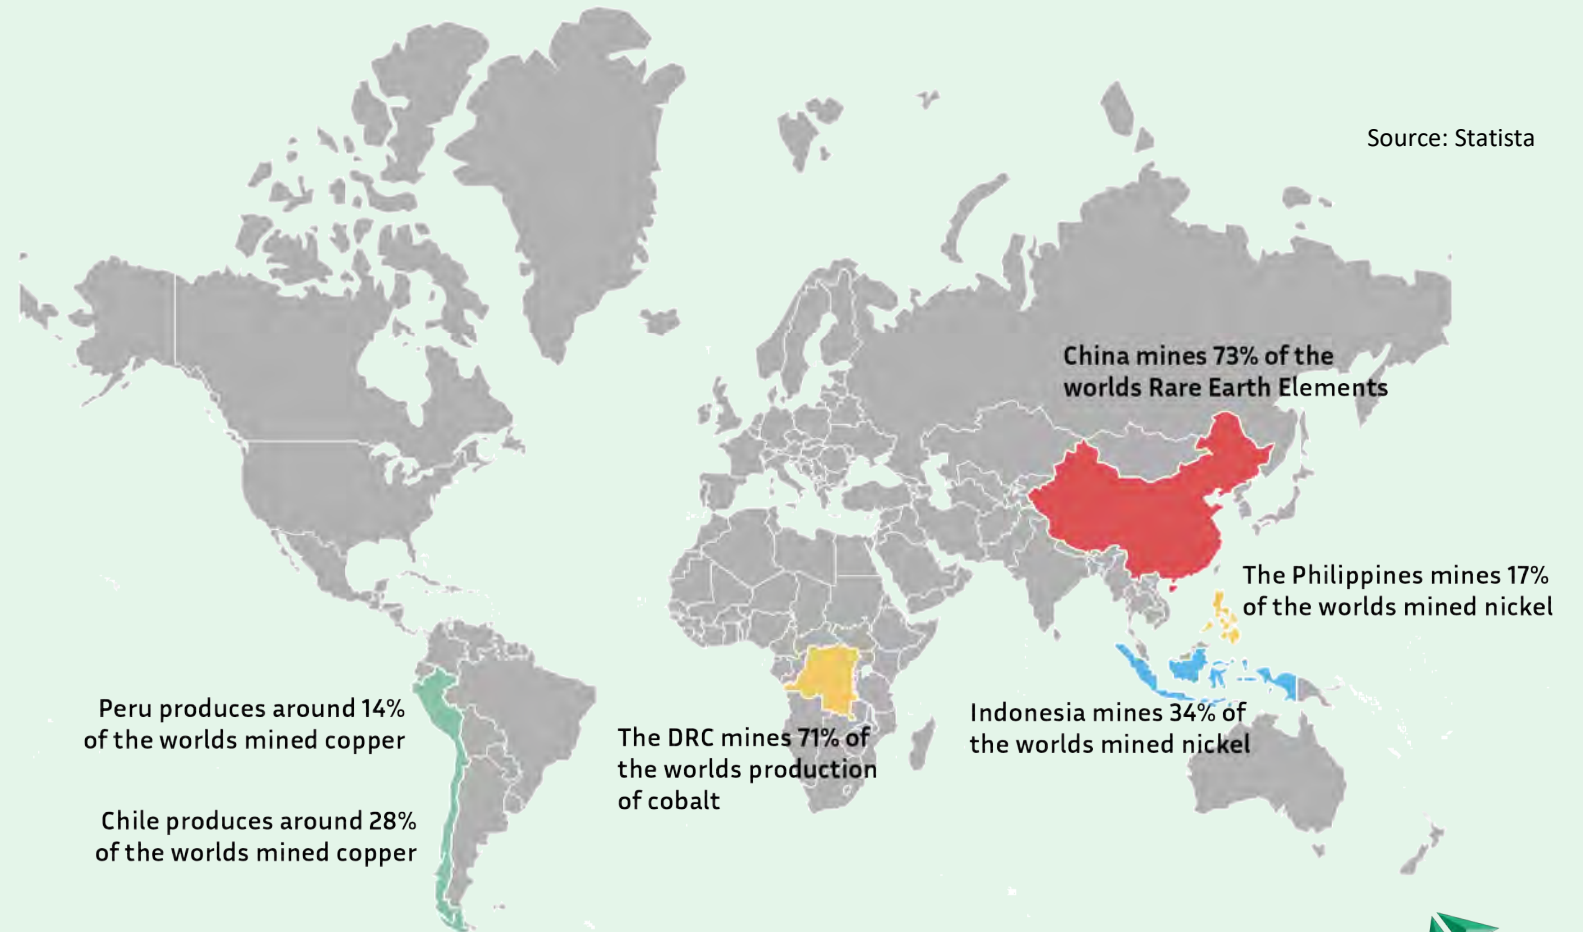

Source: Critical Materials and E-mobility, report by Aperio and Eurobattery Minerals

The world of battery minerals mining today

“There can be no growth and sustainability of the mining industry without human rights”

Deprose Muchena, Director for East and Southern African at Amnesty International

The Company

Our vision

Help Europe to become self-sufficient in ethical and fully traceable battery minerals.
